PROFESSIONAL SUMMARY

Full-stack developer pursuing a **Master's degree in Software Engineering and Rapid Application Development** at ISET Sousse. Experienced in building production-grade desktop and web applications with WinDev, Spring Boot, Symfony and Python. Passionate about **cybersecurity** — from network traffic analysis and ethical hacking fundamentals to secure software design. Cross-disciplinary background spanning industrial process optimization, IT support, and software development. Motivated, detail-oriented, and open to remote opportunities.

WORK EXPERIENCE

Full-Stack Software Developer

April 2026 — Present

OneClick · AI Munastir, Tunisia

- Develop desktop and web applications using WinDev and WebDev for business clients.
- Design relational database schemas and optimize SQL queries for performance.
- Apply security best practices including input validation, access control, and authentication.
- Participate in agile sprints, code reviews, and technical documentation.
- Translate client requirements into technical specifications and functional prototypes.

Technical Support Technician (SAV)

May 2025 — March 2026

Takiacademy · Sousse, Tunisia

- Diagnosed and resolved hardware, software, and network issues for end-users.
- Performed installation, configuration, and updates of applications and systems.
- Delivered remote preventive and corrective maintenance assistance.
- Trained users to optimize the use of IT tools and platforms.

Process Technician

August 2023 — March 2025

Rosenberger · Enfidha Industrial Zone

- Created camera inspection systems for production line quality control.
- Managed equipment parameters during product changes and new product introductions.
- Reduced production line downtime through optimization of maintenance processes.
- Conducted MSA (Measurement System Analysis) on test equipment.

End-of-Study Intern — Full-Stack Developer

January 2023 — June 2023

Dot-IT · Sousse, Tunisia

- Designed and developed a real-time sports ground reservation platform (PHP, MySQL).
- Implemented security hardening against XSS, CSRF, and SQL injection attacks.
- Created an intuitive UI and live availability system for sports facilities.

E-Commerce Website Developer

September 2022 — October 2022

Freelance · Remote

- Designed and developed a dynamic e-commerce website from scratch.
- Integrated real-time stock management and a seamless purchasing experience.
